

# Introduction to Communication Systems Using National Instruments Universal Software Radio Peripheral Lab Manual

Authors: Anees Abrol and Eric Hamke  
Contributors: Carlos Adrian Martinez Yero ,  
Olajide Durosinmi, Jeffery Love  
Editor: Dr. Ramiro Jordan

THE UNIVERSITY *of*  
NEW MEXICO

November 1, 2014

**Table of Contents**

1	Introduction .....	1
1.1	Syllabus .....	1
1.2	Structure of Labs .....	4
1.2.1	Lab Equipment .....	4
1.2.2	Format of Labs .....	4
2	An Introduction to Digital Communications Lab.....	6
2.1	Summary .....	6
2.2	Background .....	6
2.2.1	Software and Other Materials for the Course .....	6
2.2.2	Introduction to NI USRP-2920.....	6
2.2.3	Introduction to National Instruments LabVIEW .....	6
2.3	Pre-Lab .....	8
2.4	Lab Procedure .....	8
2.4.1	Global set-up.....	8
2.5	Set-up steps .....	8
2.5.1	VIs to be used in the lab:.....	9
2.5.2	Tx VI:.....	9
2.5.3	Rx VI: .....	9
2.5.4	Broadcast Mode.....	10
2.5.5	Students' receiver set-up.....	11
2.5.6	Point to point Wireless (P2PW) .....	12
2.5.7	Loop-back (Cable Carrier Example).....	12
2.6	TA Notes for Section 3.1 TA's Transmitter Set-up .....	13
2.7	Lab Writeup.....	14
2.8	References .....	15
3	Frequency-domain Characterization of Signals: A Look at the Fourier Transform.....	16
3.1	Summary .....	16
3.2	Background .....	16
3.2.1	Software and Other Materials for the lab.....	16
3.2.2	Introduction to the Fourier Transform .....	16
3.3	Pre-Lab .....	20
3.4	Lab Procedure .....	20
3.4.1	FFT .....	20
3.4.2	Worksheet: The Effect of Varying the Pulse Duration .....	21
3.4.3	Monitoring the spectrum with NI USRP and LabVIEW spectrum monitoring example VI	
	23	

3.5	Lab Write-up .....	27
3.6	References .....	28
4	Digital Filter Design: Introduction to LabVIEW Filter Design Toolkit. ....	29
4.1	Summary .....	29
4.2	Background .....	29
4.2.1	Finite Impulse Response Filters .....	29
4.2.2	Infinite Impulse Response filters.....	29
4.2.3	Sampling frequency .....	30
4.2.4	Filter design specifications.....	30
4.2.5	Design methods .....	32
4.3	Pre-Lab .....	33
4.4	Lab Procedure .....	36
4.4.1	Description .....	36
4.5	Lab Write-up .....	47
4.6	References .....	48
5	Amplitude Modulation.....	49
5.1	Summary .....	49
5.2	Background .....	49
5.2.1	Amplitude Modulation.....	49
5.3	Pre-Lab .....	51
5.3.1	Transmitter .....	51
5.3.2	Receiver.....	54
5.4	Lab Procedure .....	57
5.4.1	Worksheet: The Effect of Varying the Modulation Index .....	59
5.4.2	Worksheet: The Effect of Varying the Receiver Gain.....	60
5.5	Lab Write-up .....	61
5.6	References .....	62
6	Frequency Modulation.....	63
6.1	Summary .....	63
6.2	Background .....	63
6.2.1	Frequency Modulation.....	63
6.2.2	Frequency Demodulation .....	65
6.3	Pre-lab.....	66
6.3.1	Transmitter .....	66
6.4	Lab Procedure .....	70
6.4.1	Receiver.....	70
6.4.2	Testing the transmitter and receiver .....	73
6.5	Lab Write-up .....	76

6.6	References .....	77
7	Pulse-Position Modulation.....	78
7.1	Summary .....	78
7.2	Background .....	78
7.2.1	Pulse-Position Modulation.....	78
7.3	Pre-Lab .....	81
7.3.1	VIs to be used in the lab:.....	82
7.3.2	Transmitter (PPM_Lab_TX.vi) .....	82
7.3.3	Receiver (PPM_Lab_RX.vi) .....	86
7.4	Lab Procedure .....	88
7.4.1	Worksheet: The Effect of Removing Timer Sub-VI .....	91
7.4.2	Worksheet: The Effect of The Clock's Duty Cycle .....	92
7.4.3	Worksheet: The Effect of Phase on PPM Transmission .....	93
7.5	Lab Write-up .....	94
7.6	References .....	95
8	Random Process, Cross-correlation and Power Spectral Density.....	96
8.1	Summary .....	96
8.2	Background .....	96
8.2.1	RADAR .....	96
8.2.2	Cross-Correlation .....	97
8.2.3	Power Spectral Density .....	98
8.3	Pre-Lab .....	99
8.3.1	RADAR Transmitter .....	99
8.3.2	RADAR Return Processing .....	101
8.3.3	Radar Simulation (Debugging of sub-VIs) .....	104
8.4	Lab Procedure .....	106
8.4.1	Worksheet: The Effect of Distance to Target on Cross-correlation and Beat Frequency Measurements .....	106
8.4.2	Worksheet: The Effect of Noise on Cross-correlation and Beat Frequency Measurements .....	108
8.4.3	Worksheet: RADAR Operation .....	110
8.5	Lab Write-up .....	113
8.6	References .....	114
9	Amplitude Modulation with Additive Gaussian White Noise .....	115
9.1	Summary .....	115
9.2	Background .....	115
9.2.1	Additive Gaussian White Noise .....	115
9.3	Pre-Lab .....	116

9.3.1	Transmitter .....	116
9.3.2	Receiver.....	119
9.4	Lab Procedure .....	123
9.4.1	Worksheet: The Effect of Varying the Noise Level .....	126
9.4.2	Worksheet: The Effect of Low-pass Order on Envelope Detection .....	128
9.5	Lab Write-up .....	129
9.6	References .....	130
10	Frequency Modulation with Additive Gaussian White Noise .....	131
10.1	Summary .....	131
10.2	Background .....	131
10.2.1	Noise Performance of Frequency-Modulation Systems .....	131
10.3	Pre-Lab .....	132
10.3.1	Transmitter .....	132
10.3.2	Receiver.....	135
10.4	Lab Procedure .....	138
10.4.1	Testing the Transmitter and Receiver.....	138
10.4.2	Worksheet: The Effect of Varying the Noise Level .....	141
10.4.3	Worksheet: The effect of low-pass filter order on envelope detection .....	143
10.5	Lab Write-up .....	144
10.6	References .....	145
11	Frequency Domain Multiplexing.....	146
11.1	Summary .....	146
11.2	Background .....	146
11.2.1	Frequency-Division Multiplexing Basics.....	146
11.3	Pre-Lab .....	148
11.4	Lab Procedure .....	155
11.4.1	Testing the Transmitter and Receiver.....	155
11.4.2	Worksheet: The Effects of Channel Separation and Cross-Talk.....	159
11.4.3	Worksheet: The Effect of Varying the Modulation Index .....	161
11.5	Lab Write-up .....	162
11.6	References .....	163
12	Entropy and Coding Efficiency .....	164
12.1	Summary .....	164
12.2	Background .....	164
12.2.1	Digital Communications Systems .....	164
12.2.2	Source Coding, Entropy and Entropy Encoding .....	165
12.2.3	Huffman Coding .....	165
12.2.4	Source Coding Efficiency .....	165

12.3	Pre-Lab .....	169
12.4	Lab Procedure .....	169
12.4.1	Code Tree for an Image.....	169
12.4.2	Huffman Codebook.....	172
12.4.3	Code Efficiency Computations .....	173
12.4.4	Lab_EE.vi .....	173
12.5	Lab Write-up .....	175
12.6	References .....	176
13	Asynchronous Serial Communication .....	177
13.1	Summary .....	177
13.2	Background .....	177
13.2.1	UART Basics.....	177
13.3	Pre-Lab .....	179
13.3.1	Sample Voltage to Bit Polarity Mapper.....	181
13.3.2	Bit Detection .....	181
13.3.3	Bit Counting and Storage .....	182
13.3.4	Binary to Decimal Conversion and Byte Storage .....	183
13.4	Lab Procedure .....	183
13.4.1	Debugging the Resettable Counter SubVI.....	183
13.4.2	Debugging the Bit Counter and Storer.....	185
13.4.3	Debugging the Binary to Decimal Conversion and Byte Storage.....	186
13.5	Lab Write-up .....	187
13.6	References .....	188
14	Binary Phase Shift Keying.....	189
14.1	Summary .....	189
14.2	Background .....	189
14.2.1	Digital Communications Systems.....	189
14.2.2	Binary Phase Shift Keying Modulation Basics .....	189
14.2.3	Binary Phase Key Shifting Demodulation Basics .....	190
14.3	Pre-Lab .....	191
14.3.1	BPSK Modulator .....	192
14.4	Lab Procedure .....	193
14.4.1	BPSK Demodulator .....	193
14.4.2	Testing it all together .....	194
14.5	Lab Write-up .....	195
14.6	References .....	196
15	Appendix A: LabVIEW Tutorial .....	198
16	Appendix B: Communications Palettes.....	200

17 Appendix C: Antenna Specifications..... 205
